## Overall

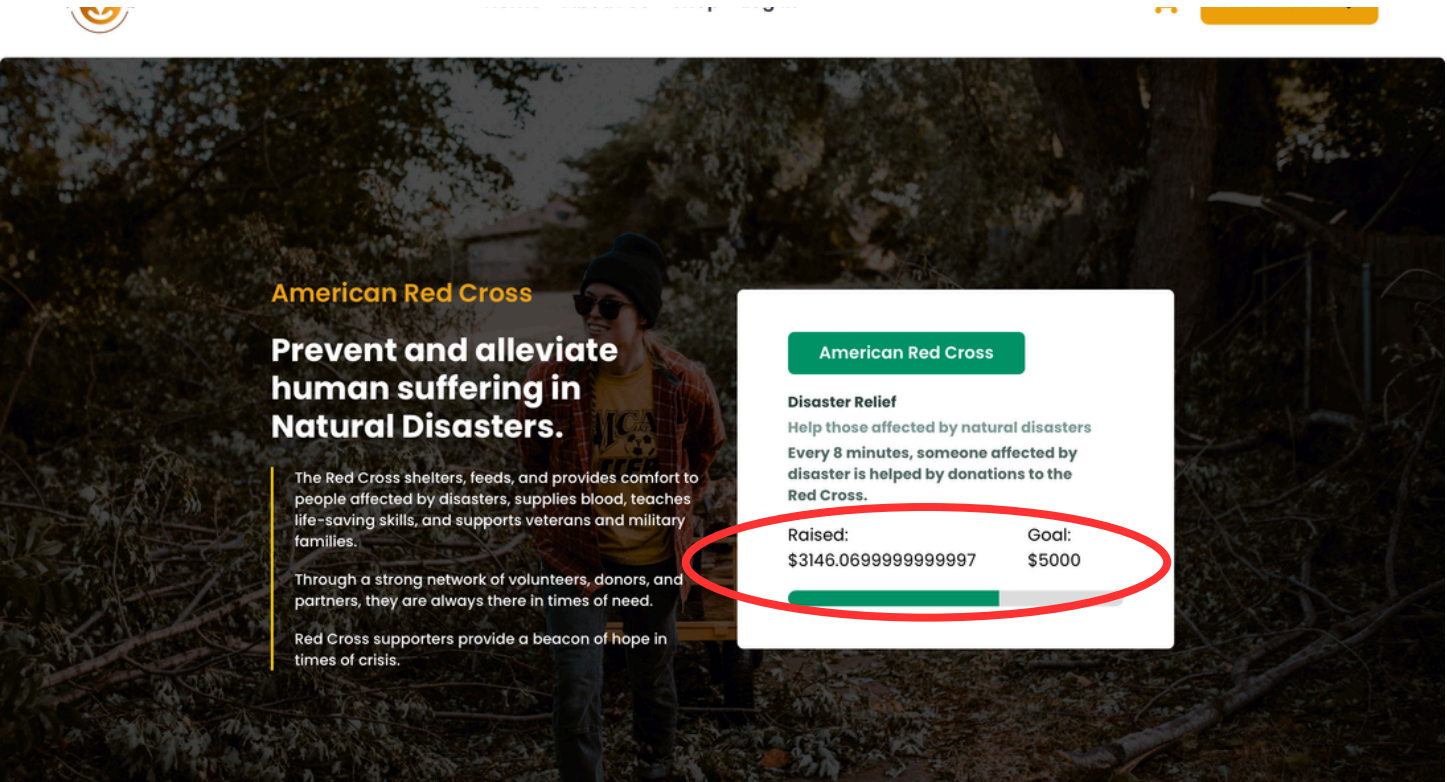

- None of the emails are working. When I tried to create an account I never received the verification code.
- Please ensure all dollar amounts are in US Dollars \$00.00 format
- Please ensure pictures are not distorted.
- Is there a way to use my Hostinger email domain to send the emails? I want to be able to customize the emails (and email address it sends from) and have them trigger when certain actions are taken. I also need to be able to resend an email if the customer did not receive the first time. For example:
  - Customize the Security passcode email when signing up for an account
  - Is there a way for the Organizer and me to receive a copy of their submission by email once completed? Including the attestation section.
  - Welcome email: Sent once an account is created. Provides overview of what the company is, what's next (start a fundraiser or join one) and how they can shop to support standing causes
  - Fundraiser approval or denial email sent once the fundraiser has been approved/denied
    - If approved, provide details of the fundraiser including start, how to invite participants (add their email to site, use email or SMS template, set-up ACH or Check option. Also provide link to Social Media flyers & printout flyers to customize and use.
  - Join Fundraiser Email: Invite participants to join fundraiser. Include link to templates they can use and best practices for when it starts
  - Order confirmation email. Once an order is placed, a confirmation should be sent to customer with order details
  - Shipping notice email. Need to be able to input tracking information once an order has shipped.
  - Emails sent 2 days before fundraiser starts, once fundraiser starts, mid-way through, one day before ending and once it ends. Each email will have resources for each period

Customer should be allowed to add products to the shopping cart and see the shopping cart without having to login or create an account. They should be directed to create/login only when they are ready to checkout

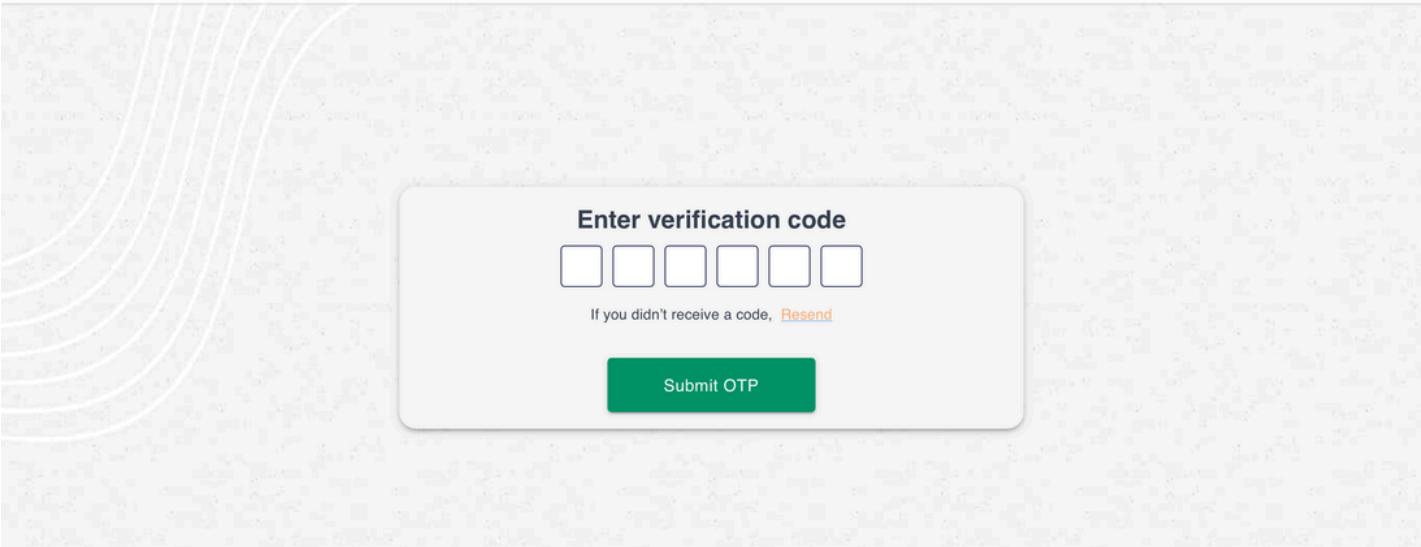

All dollar amounts and prices on the entire website should be in this format \$00.00. Please make sure the additional numbers are not showing.

Add language above Enter verification code. “Please check your email for the verification code. If you did not receive in your inbox, please check junk/spam folder.”

Please check the format of the picture and boxes. The orange and green boxes should be the same size and the picture should not be distorted.
